Testing & Beyond

WHAT WE DO

Based on an extensive expertise in skin tissue engineering and cell biology, StratiCELL is a renowned **service provider of *in vitro* & *ex vivo* skin testing**. Today, StratiCELL is supporting more than 250 dermo-cosmetic and pharmaceutical actors in revealing the benefit of their innovative actives on skin biology, **from drug discovery to claim substantiation**.

As market players are constantly looking for new concepts, our R&D team is continuously enlarging the range of new skin models and tests at the cutting edge of innovation.

At StratiCELL, we know that reliable partnership is the key to success! **"StratiCELL, Testing & Beyond"** clearly reveal our deep value to go beyond testing to build a relationship of trust and loyalty.

Contact our team to share ideas and set up testing strategies according to your specific needs.

COSMETIC TESTING

StratiCELL supports your claim substantiation by defining the *in vitro* and *ex vivo* efficacy of innovative raw ingredients and formulated skin care products.

"Our scientists have been providing support to your innovations with passion and expertise for almost 20 years."

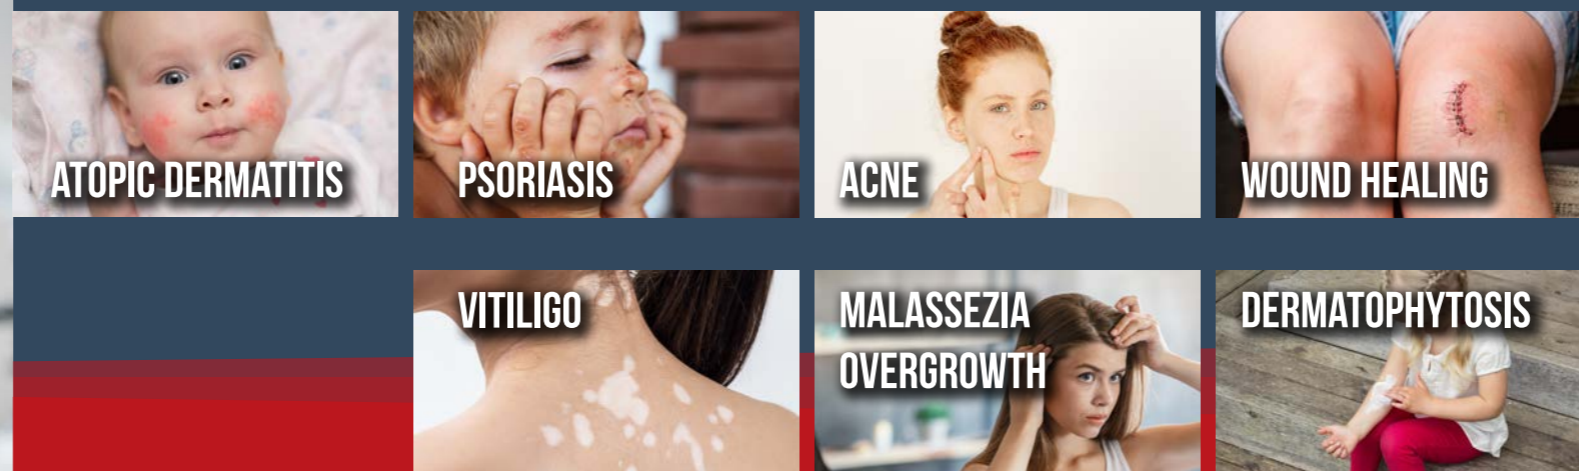

THEY SPEAK ABOUT US:

« At TEMISIS Therapeutics, we develop small molecules for the treatment of unmet medical needs. Psoriasis and Atopic Dermatitis are some of our focuses. Thanks to StratiCELL's *in vitro* models and expertise on skin biology we demonstrated the real benefit of one of our compounds to cure Psoriasis. Thanks to StratiCELL's knowledge we speeded up the discovery-phase and managed to identify an original mode of action for our lead compound. »

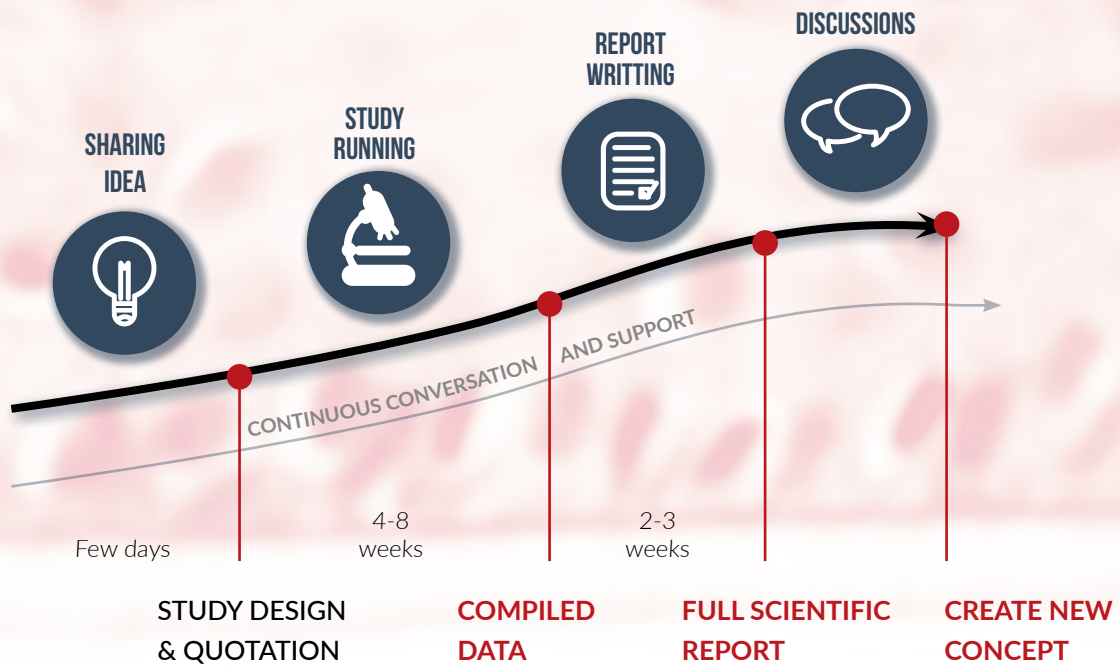

DERMATOLOGY

Using in-house *in vitro* skin models and testing tools, StratiCELL demonstrates preclinical benefits and provides mechanistic data of innovative skin care candidates.

WORKING WITH US

With a strong collaborative R&D policy, StratiCELL participates in several projects from the EU H2020 Research & Innovation Program.
